

Hidden Text Detection and Masking Example

Artificial Intelligence (AI) refers to the simulation of human intelligence in machines that are designed to think, learn, and make decisions.

AI systems are capable of performing tasks that typically require human intelligence, such as understanding language, recognizing patterns, solving problems, and making predictions.

AI can be broadly categorized into three types: Narrow AI, General AI, and Superintelligent AI. Narrow AI, also known as Weak AI, is designed to perform specific tasks, such as voice recognition, recommendation systems, or image classification. _____

Most AI systems in use today fall under this category. General AI refers to machines that possess the ability to understand, learn, and apply knowledge across a wide range of tasks at a human level.

Superintelligent AI is a theoretical concept describing systems that surpass human intelligence in virtually all areas.

Machine Learning (ML) is a core subset of AI that enables systems to learn from data and improve over time without being explicitly programmed.

Deep Learning, a subset of ML, uses artificial neural networks inspired by the human brain to process large amounts of data and identify complex patterns.

These technologies power applications such as speech assistants, autonomous vehicles, fraud detection systems, and medical diagnostics.

AI is transforming industries including healthcare, finance, manufacturing, education, and cybersecurity. ■

In healthcare, AI assists in disease detection and personalized treatment planning. In

finance, it helps detect fraudulent transactions and automate trading strategies.

In manufacturing, AI improves efficiency through predictive maintenance and process optimization.

In summary, AI is a rapidly evolving field that combines computer science, data, and advanced algorithms to create systems capable of intelligent behavior.

As technology advances, AI is expected to play an increasingly significant role in shaping the future of work, innovation, and daily life.
